APT MANUFACTURING SOLUTIONS RECEIVES HIGH AWARDS FROM FANUC ROBOTICS

CLEARWATER, FL – APT Manufacturing Solutions recently attended the Fanuc Authorized System Integrators executive conference where the company was honored with 2 of the 3 awards presented during the conference, “**Sales Leadership Award**, Exemplary level of sales in 2017” and “**The Excellence in Intelligent Robotics Award**, Sales leadership of intelligent products in 2017.

According to Anthony Nighswander, President, “APT is among an elite group of integrators continually honored by FANUC for our dedication to advanced manufacturing and robotics. We appreciate the entire APT team, their hard work, and dedication to changing industry in America. Awards like these are due to the wonderful work they perform every day.”

APT Manufacturing has been awarded at the annual FANUC conferences multiple years running, thanks to its continued growth and diversification. APT and FANUC look forward to many years of partnership in advanced manufacturing and education.

APT Manufacturing Solutions, founded in 1996, specializes in solving problems for manufacturers. It is among the largest machine shops in the area, as well as welding and fabrication. APT serves leading manufacturers with custom designed and built gauges, along with custom machines, packaging equipment, and full assembly lines.

APT is an authorized FANUC robot integrator, the leading robot manufacturer in the world.

It serves a wide range of customers in the automotive, food, pharmaceutical, firearms, aerospace, and furniture industries.
