FANUC CRX-10iA

Features:

FANUC CRX-10iA and CRX-10iA/L Robots are lightweight collaborative robots with a smooth and approachable design.

- Two reach options available to meet various applications.

CRX-10iA	Payload 10kg	Reach: 1249mm
CRX-10iA/L	Payload 10kg	Reach: 1418mm

Safety

- Similar to the other FANUC CR-series robots, the CRX robot stops safety upon light contact with humans.

Easy installation

- The lightweight arms and compact R-30iB Mini Plus controller enables easy installation without any lifting equipment.

Ease of use

- Manual guided instruction and the new user interface offers intuitive operation and easy teaching.
- The under flip motion on J3 makes it easy to access to the back side. (CRX-10iA/L)
- Easy connection to third-party grippers
 - Other intelligent features such as iRVision (integrated vision) and iRPickTool are also available.

Reliability

- FANUC's CRX robots utilize the renowned high reliability design from years of experience suited for industrial use.

FANUC CRX-10iA/L
